1. The following is an examiner's statement of reasons for allowance: none of prior art of record taken alone or in combination shows methods for determining a root mean square of a signal for controlling a converter comprising squaring the signal, sampling the squared signal n times during a cycle period to obtain n samples, summing the first $n-1$ samples to obtain a first value, multiplying the first value by a sampling time and a frequency of the signal to obtain a second value (as recited in independent claims 1 and 21); or sampling the signal n times during a cycle period to obtain n samples, squaring the first $n-1$ samples to obtain $n-1$ squared samples, summing the $n-1$ squared samples to obtain a first value, multiplying the first value by a sampling time and a frequency of the signal to obtain a second value (as recited in independent claim 11); and further commonly comprising determining a compensation factor, adding the compensation factor to the second value to obtain a third value, and determining a square root of the third value to obtain a root mean square result as recited in all independent claims of the instant application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
